Journal of Radioanalytical and Nuclear Chemistry, Articles, Vol. 130, No. 2 (1989) 477–480

Index to Volume 130

No. 1.

N. Shinohara, N. Kohno, T. Suzuki, S. Unuda (Naka-gun, Ibaraki-ken, Japan)
Determination of ^{237}Np in spent fuel by use of inherent ^{239}Np as a chemical yield monitor 3

K. Akiba, H. Hashimoto (Sendai, Japan)
Recovery of uranium by polyurethane foam impregnated with 5,8-diethyl-7-hydroxy-6-dodecanone oxime 13

Chung-Shin Lee, Yun-Ming Wang, Wu-Long Cheng, Gann Ting (Taiwan, Republic of China)
Chemical study on the separation and purification of promethium-147 21

N. Q. Liu, S. Galassini, G. Moschini, M. Nagj, J. Injuk, V. Valković (Legnaro, Italy and Zagreb, Yugoslavia)
Selenium determination in biological samples by X-ray emission spectroscopy 39

M. Nagj, A. Stergaršek, J. Injuk, V. Valković (Zagreb and Ljubljana, Yugoslavia)
Uranium separation from high iron concentration by the use of ammonium pyrrolidine dithiocarbamate 47

Y. Shiokawa, K. Suzuki, M. Yagi, S. Suzuki (Sendai, Japan)
A new internal conversion electron spectrometer and its application to determine the ^{240}Pu to ^{239}Pu isotope ratio 55

D. W. Kim, J. H. Jung (Cheongju, Republic of Korea)
Influence of chelating agents in eluent on the separation factor of lithium isotopes 63

N. Lavi, Z. S. Alfassi (Yavne and Beer-Sheva, Israel)
Determination of trace elements Cd, Co, Mo, Se, Ti and V in natural waters by neutron activation analysis 71

T. Honda, T. Oi, T. Ossaka, T. Nozaki, H. Katihana (Kanagawa and Tokyo, Japan)
Determination of rare earth elements in hot spring water and crater lake water samples by neutron activation analysis incorporating coprecipitation process using aluminium as a collector 81

M. T. Crespo, J. M. Los Arcos, C. E. Granados, M. L. Aceña (Madrid, Spain)
On the concentration and determination of plutonium in natural waters by adsorption on MnO_2 filters 99

M. Saiki (São Paulo, Brasil)
Solvent extraction studies using tetracycline as a complexing agent, XV. 111

Elsevier Sequoia S. A., Lausanne
Akadémiai Kiadó, Budapest

INDEX TO VOLUME 130

T. Kouris, C. Papadopoulou, G. D. Kanias, E. Bairaktari-Kouri, G. Theodossiadis (Athens, Greece)
Study of the trace element content in human cataractous lenses by instrumental neutron activation analysis 121

Chien C. Lin (Pleasanton, CA, USA)
Chemical behaviour and steam transport of nitrogen-13 in BWR primary system 129

N. Pilz, P. Hoffmann, K. H. Lieser (Darmstadt, GDR)
In-line determination of heavy elements by gamma ray-induced energy-dispersive K-line XRF 141

N. Filipović-Vinceković, Lj. Brečević, D. Kralj (Zagreb, Yugoslavia)
Interactions in clay/electrolyte systems 155

Y. Yamada, M. Itoh, N. Kiriyama, C. Nishimoto, K. Komura, K. Ueno (Kanazawa and Ishikawa, Japan)
Measurement of tritium in tree rings: isolation of α-cellulose from wood chips using explosive depressurization 169

N. Souka, F. Abdel-Rahim, M. R. Mahmoud (Cairo, Egypt)
Studies on the radiolysis of U(VI)–thoron complex 177

Jia Wei-Jie, Zhou Zu-Min, He A-Di, Wang Zhi-Lin, Chin Chi-Tsung (Shanghai, The People's Republic of China)
Kinetic studies on the solvent extraction of uranium(VI) from phosphoric acid solution with HDEHP using laser-induced optical fiber fluorimetry 187

A. A. Fahad, A. W. Ali, R. M. Shihab (Baghdad, Iraq)
Mobilization and fractionation of ^{137}Cs in calcareous soils 195

P. V. Achuthan, B. L. Jangida, M. Sundaresan (Bombay, India)
Ion exchange studies of U(VI), Th(IV), Pu(IV) and Eu(III) on a macroreticular resin in TBP-Shell Sol-T solutions 203

A. M. Barouni, L. Bakos, É. Zemplén–Papp (Budapest, Hungary)
Internal standard method utilized for 14 MeV neutron induced characteristic X-ray emission analysis 209

J.-C. Roy, J.-E. Côté, R. W. Durham, S. R. Joshi (Quebec, Quebec and Burlington, Ontario, Canada)
A study of the indium and germanium photopeaks in the background spectra of Ge spectrometers with a passive shield 221

Bibliographic Collection

E. Bujdosó (Budapest, Hungary)
The Chernobyl reactor accident, Part 3 231

No. 2.

K. Matumoto, M. Yagi (Sendai, Japan)
Determination of phosphorus in low-alloy steels by alpha-particle activation analysis 243

M. Zieliński (Kraków, Poland)
Deuterium kinetic isotope effect in the oxidation of sodium (2–D_1)valerate with manganate in 3M aqueous NaOH solutions 251

F. Ditrói, I. Mahunka, S. Takács, S. Seif El-Nasr (Debrecen, Hungary and Kuwait)
Trace element analysis of motor oil by CPAA method on external proton beam 263

T. Sekine, K. Yoshihara, Zs. Németh, L. Lakosi, Á. Veres (Sendai, Japan and Budapest, Hungary)
A new detection method of ^{99}Tc by nuclear excitation 269

J. Tirira, J. P. Frontier, P. Trocellier (Gif-sur-Yvette, France)
Hydrogen analysis by elastic recoil spectrometry: a new approach for absolute quantitative measurement 279

N. D. Drndarski, S. Marić (Beograd and Novi Sad, Yugoslavia)
Determination of gamma-emitting radionuclides in the Sava river deposits 287

M. M. Senyavin, V. A. Nikashina, V. A. Novikova, G. D. Gradev, I. G. Stefanova, A. G. Avramova (Moscow, USSR and Sofia, Bulgaria)
Comparative study of ion-exchange properties in natural clinoptilolites of the USSR and Bulgaria with the aim of purifying liquid sewage from atomic power stations, II. 293

S. Musić, S. Popović, M. Gotic, (Zagreb, Yugoslavia)
Influence of iron ions on the structural properties of Zn-borosilicate glasses 299

J. Tirira, P. Trocellier (Gif-sur-Yvette, France)
Elastic recoil detection analysis 311

Kong Ping, Chai Chifang (Beijing, China)
A new quantitative radiochemical separation procedure to determine Ir at 10^{-12} g/g level in geological samples by a long chain primary amine extraction 321

J. A. Schramke, Dhanpat Rai, R. W. Fulton, G. R. Choppin (Richland, Washington and Tallahassee, Florida, USA)
Determination of aqueous plutonium oxidation states by solvent extraction 333

S. Ahmad, I. H. Qureshi (Islamabad, Pakistan)
Fast mercury removal from industrial effluent 347

J. L. Thompson (Los Alamos, N. M., USA)
Actinide behavior on crushed rock columns 353

INDEX TO VOLUME 130

R. Dybczyński, M. Wasek, H. Maleszewska (Warszawa, Poland)
A definitive method for the determination of small amounts of ,copper in biological materials by neutron activation analysis 365

J. Baldas, S. F. Colmanet (Yallambie, Victoria, Australia)
The use of ^{3}H- and ^{14}C-labelled tyrosines and product analysis to measure the mono- to diiodination rate constant ratio for iodination by molecular iodine and chloramine-T/I^- 389

T. Okai, Y. Takashima (Fukuoka, Japan)
Analytical method for atmospheric tritium with a portable tritium sampling system 399

S. Kapoor, C. Gopinathan, R. M. Iyer (Bombay, India)
Reactions of trapped electrons in methanol-isopropanol glasses irradiated at 77 K 409

M. L. Böttger, S. Niese, D. Birnstein, W. Helbig (Dresden, GDR)
Activation analysis: The most important method for control of purity of semiconductor silicon 417

E. Djurova, I. Stefanova, G. Gradev (Sofia, Bulgaria)
Geological, mineralogical and ion exchange characteristics of zeolite rocks from Bulgaria 425

N. V. Deorkar, S. M. Khopkar (Bombay, India)
Separation of uranium(VI) as chloride complex by solvent extraction with dicyclohexyl-18-crown-6 433

H. M. Zhu, X. Z. Tang (Beijing, China)
Determination of Pu in environmental soil using ^{238}Pu as a yield tracer 443

N. K. Shah, C. M. Wai (Moscow, Idaho, USA)
Preconcentration of metal dithiocarbamate complexes on C18-bonded silica gel for neutron activation analysis 451

Bibliographic Collection

E. Bujdosó (Budapest, Hungary)
Environmental radiochemistry and radioactivity 461
